Baxter Foundation celebrates 50 years of philanthropy

By Sara Reeve

The Donald E. and Delia B. Baxter Foundation celebrated its 50th anniversary at a reception on April 27 held in the Hazyne J. Norris Cancer Research Tower’s Aesry Conference Center Atrium. The foundation, which was established by Delia Baxter to honor her husband Donald, made its first grant of $6,000 in 1959 to USC.

In recognition of the extraordinary contributions of the foundation to the faculty and students of the Keck School of Medicine, Dean Carmen A. Puliafito and M. Elizabeth Finti, vice dean for research, unveiled the new name of the lower ground floor of the Hazyne J. Norris Cancer Research Tower—the Donald E. and Delia B. Baxter Foundation Floor.

In a letter to the foundation’s trustees, USC President Steven B. Sample expressed his profound gratitude for the foundation’s generosity and commitment. “With gifts in excess of $10 million, your family has demonstrated its unwavering confidence in the school, its faculty and students,” he stated. “Your family has had and will continue to have an extraordinary effect on the Keck School, medical education, research and human health around the globe.” Puliafito presented the letter to the trustees, along with a letter from California Governor Arnold Schwarzenegger.

Through the Baxter Junior Faculty Fellowship Program and the Baxter Medical Student Summer Research Fellowship Program, the foundation has provided 25 faculty members and more than 600 medical students with resources to pursue cutting-edge research.

Jonah Chan, assistant professor of biochemistry and molecular biology and a 2007 Baxter Fellow, spoke to the trustees and guests about the common goals of the foundation and the Keck School’s faculty and students. “We are all here today because we all share in the same vision—to make a difference and really contribute something special to humanity by minimizing human suffering,” said Chan. “All of us gathered here are striving to do this, and it is only through your generosity, contributions and commitment to scientific research that we can make substantial progress.”

Foundation trustee Donald Haake offered his thanks to the university administration, faculty and students. “The truth is we are very honored and feel fortunate to be able to support each and every one of you and the research that you do,” he said. “The things you do make the world a better place.”

“The things you do make the world a better place.”

— Baxter Foundation Trustee Donald Haake

New executive team takes helm of USC hospitals

By Sara Reeve

In a recent memo sent to hospital personnel, Mitch Creem, CEO for the USC University Hospital and USC Norris Cancer Hospital, announced the new senior management team that will help lead the hospitals. “This team will be working closely with me and with all of you as we enter this new era of excellence for both USC University Hospital and USC Norris Cancer Hospital,” said Creem.

The list includes several familiar names of individuals with years of experience at the hospitals, as well as new additions. “Lack any dynamic organization, our hospital management structure will be evolving as we expand our size and scope of operations with new programs,” said Creem. “I expect our management team to drive organizational change and create a collaborative and supportive environment for all of you so that we may provide the highest standard of service to our patients. Together, we will create and implement a vision of excellence for USC’s new academic medical center.”

Donald Larsen joins the management team as chief medical officer for the hospitals. His wide-ranging responsibilities include developing and implementing system-wide solutions to improve clinical outcomes, patient satisfaction, and the academic environment for teaching programs. Larsen, an interventional neuroradiologist and associate professor at the Keck School of Medicine, has been on faculty since 1998 and has served as medical director of The Doctors of USC since August 2006, providing leadership on such issues as medical quality, risk management, credentialing and peer review. He will continue to serve in that role for The Doctors of USC as he assumes the medical director role for the hospitals.

In Case of an Emergency...

Call the Emergency Information phone: 213-740-9233 The emergency telephone system can handle 1,400 simultaneous calls. It also has a backup system on the East Coast.

Visit the USC Web: http://emergency.usc.edu This page will be activated in case of an emergency. Backup Web servers on the East Coast will function if the USC servers are incapacitated.

MANAGEMENT: Executive team assembled to guide hospitals into ‘new era of excellence’

Scott Evans serves as operating executive, retaining the same scope of responsibility and authority that he had prior to the change in hospital ownership. He is in charge of the daily operations of professional, supporting and administrative areas of the hospitals, fostering teamwork among hospital directors and staff in collaboration with the medical staff leadership.

Evans served as chief operating officer since 2007, and prior to that appointment, he was the director of pharmacy, leading operations for the hospitals’ three separately licensed pharmacies. Evans is also an adjunct faculty member with the USC School of Pharmacy and is director for the School of Pharmacy’s Associate Senior Vice President, Health Sciences Public Relations and Marketing: Jane Brust

Senior Vice President, University Relations: Martha Harris
Phone: 323-442-2830 Fax: 323-442-2832
E-mail: hscwkly@usc.edu Web: uscnews.usc.edu/hscweekly RSS: http://www.usc.edu/hscw

Organizations of Nurse Executives and has been inducted into Sigma Theta Tau, the honor society of nursing. Jonathan Spees serves as the hospitals’ chief financial officer. A newcomer to USC, Spees directs and oversees the management of the hospitals’ financial planning, analysis, reporting and operations. He will provide the strategic and operational direction necessary to achieve financial performance targets and increase profitability. He is responsible for directing the development and implementation of the hospitals’ annual operating budgets. Prior to joining USC, Spees was a senior executive vice president of corporate development and finance and a founder of Merit Health Systems, LLC, a hospital management company. He has a successful track record in health care investment banking and corporate finance, including mergers and acquisitions, strategic planning, auditing and consulting. Spees is a certified public accountant and member of the American Institute of Certified Public Accountants and the California Hospital Financial Management Association.

Karen Ribback, another newcomer to USC, has assumed the new position of executive director of transition and planning. Her primary role will be to support the hospitals’ transformation into an academic medical center and to facilitate their integration with the university. She will be responsible for developing relationship strategies with key partners and stakeholders, as well as leading short- and long-term strategic planning initiatives for the hospitals.

For the last 15 years, Ribback has been an independent consultant who focused on optimizing financial and organizational performance for businesses undergoing significant change. She has worked with Fortune 500 financial services companies, major educational institutions and not-for-profit organizations to effect change and improve overall business performance.

Stacy Rummel Bratcher joins the management team as interim hospital counsel, expanding her role as associate general counsel for USC health sciences. She has a diverse and extensive legal background in health care that qualifies her to provide legal counsel on a variety of issues involving our hospital programs, such as hospital/physician relationships, contract law, regulatory and compliance matters. A staff member in USC’s Office of General Counsel since 2005, Bratcher is a health care attorney who provides primary legal support for the Keck School of Medicine, USC Care Medical Group, Health Research Association and the two USC hospitals.

Prior to joining USC, Bratcher was an associate with the Los Angeles offices of health care law firms, Hooper, Lund & Bookman Inc. She practiced in the firm’s regulatory and litigation departments, handling fraud and abuse defense, Medicare and Medicaid reimbursement cases, and managed the litigation for a variety of health care providers.

Jane Brust joins the hospital management team to lead hospital public relations and marketing activities. A public relations practitioner and marketeer in academic health care for 25 years, she was recruited to USC in 2006 as associate sensor vice president for health sciences public relations and marketing. She assumes responsibility for promoting the hospitals as part of an expanded, integrated program to promote The Doctors of USC and the Keck School of Medicine through media relations, publications, internal communications, marketing, advertising and Web site development.

Brust has considerable experience in marketing academic medical centers, having led integrated communications and marketing programs at The University of Texas M. D. Anderson Cancer Center and the University of Texas Health Science Center at Houston. She is an active member of the Group on Indonesia, Advancement of the Association of American Medical Colleges.

Janis B. McLendon joins the hospital management team as interim chief human resources officer, augmenting her current role as associate senior vice president for administrative operations for USC. She will oversee employee services and labor relations, including consultation with supervisors and human resources staff regarding best practices and regulatory compliance; investigation of discrimination and harassment complaints; dispute resolution for staff complaints; and employee benefits.

McLendon has worked with the university since 1979, serving in a variety of operational, administrative support and advisory roles. She guided the HR transition related to new hospital ownership, ensuring that all personnel matters were handled during and beyond the transition. She also noted that the hospitals are recruiting a chief human resources officer and a chief information technology officer to serve on the hospital management team and provide leadership in their respective areas of hospital operations.

Symposium shines light on macular degeneration

By Cheryl Brunynick

Faculty, staff and students joined the governing board of the California Institute for Regenerative Medicine (CIRM) on April 29 for an educational program titled “Spotlight on Macular Degeneration.” Led by a panel of Keck School of Medicine experts, the program was part of a day-long meeting of CIRM’s Independent Citizens Oversight Committee hosted by the Keck School.

“Macular degeneration is the leading cause of blindness in the industrial world,” said Keck School of Medicine Dean Carmen A. Puliafito, who hosted the program and opened with an introduction about the eye condition. “In California, there are about three million people who have some degree of macular degeneration.”

According to Puliafito, with the average age of the population in the United States increasing, macular degeneration is a growing public health challenge. “As the general health of individuals improves and their activity levels remain high in advanced age, the inability to read, to drive a car, to recognize faces—which are the three things that macular degeneration steals from patients—are increasingly important,” said Puliafito.

Sharon Hayes, a macular degeneration patient cared for by Puliafito, spoke of her appreciation for treatment aimed at preserving her remaining eyesight. “Dr. Puliafito and so many others are doing everything in their power to find a cure,” said Hayes. “I am so fortunate to be under Dr. Puliafito’s care at a time when medical research is at the brink of being able to restore sight.”

Looking to the future, Puliafito said, “Much is left to be done, particularly in patients with the dry form of macular degeneration. For those patients, stem cell biology and the translation of stem cell biology into the clinic offers the opportunity to offer perhaps the most direct path to a cure.”

Martin Pera, director of the Eli and Edythe Broad Center for Regenerative Medicine and Stem Cell Research at USC, and David Hinton, professor of pathology at the Keck School of Medicine, discussed advances in stem cell research related to macular degeneration. “When I came to USC, I learned about our Doheny Eye Center and Mark Humayun and my colleague David Hinton,” said Pera. “With their expertise and with the help of the CIRM grant, there has really been remarkable progress.”

Mark Humayun, professor of ophthalmology, cell and neurobiology, and biomedical engineering, concluded with a presentation on the clinical applications of stem cell research in macular degeneration. He discussed the new minimally invasive approach to treating this condition, which is a faster and safer procedure when compared to other surgical options.

A May 1 Newsweek article quoted clinical pharmacy expert Jeffery Goad about potential shortages of flu vaccines. San Francisco affiliate KCBS-AM also interviewed Goad about vaccinations against the swine flu.

An April 30 Los Angeles Times article quoted infectious disease expert Paul Holton about precautions people should take to avoid swine flu. He was also quoted in Associated Press and Ventura County Star articles.

An April 29 Washington Post article quoted microbiologist James Ou about a new drug for Hepatitis C called Telaprevir.

An April 28 New York Times article featured a study on an experimental prostate cancer vaccine in which urologist David Pen- son was involved. Persson was also quoted or highlighted in the Wall Street Journal, the Los Angeles Times, Reuters, Bloomberg News, WebMD, and a widely carried Associated Press story.

By Carol Matthieu

Several USC health science schools and programs were ranked in this year’s edition of U.S. News & World Report “America’s Best Graduate Schools,” released April 24. The Keck School of Medicine and the physical therapy and occupational therapy programs all were ranked nationally among the elite in their field.

Ranked highest was the physical therapy program which placed first in the nation and the occupational therapy program which ranked No. 1 in the nation and the occupational therapy program which ranked No. 1 in their field.

Biokinesiology and Physical Therapy, a division at the USC School of Dentistry, has placed first in the nation since 2004. At the Health Sciences Campus, division faculty provide care at USC University Hospital and USC Norris Cancer Hospital. The first student-patient interaction takes place at USCB University Hospital, with joint clinical and academic faculty oversight.

“We have always known that we are doing excellent work here at USC, but it’s wonderful to have that confirmation from our peers,” said James Gordon, associate dean and chair of the division. “Now we just need to continue working hard to stay on top,” he added.

The USC Division of Occupational Science and Occupational Therapy has been consistently ranked among the best in the nation since the magazine first began ranking occupational therapy graduate programs in 1998.

“We are proud to continue to offer one of the top occupational therapy programs in the United States,” said Professor, Associate Dean and Chair Florence A. Clark. “With a faculty practice on the Health Sciences Campus, division faculty employ innovative occupational therapy treatment models to support the division’s research and teaching missions.”

The Keck School of Medicine of USC placed No. 39 in research among medical schools nationally, tied with Georgetown University in this year’s ranking. The school saw a slight improvement over 2008 in its reputation ranking by residency directors nationwide.

U.S. News & World Report analyzed more than 12,000 graduate programs for this year’s list, using several indicators to calculate its rankings. In its ratings of medical schools, the magazine looked at factors such as acceptance rates, the caliber of incoming students based on average GPA and MCAT scores, faculty to student ratios, and research activity. The health specialties ranking, which features the PT and OT programs, was based on the results of peer assessment surveys conducted in 2007 for the 2008 rankings.

“We have always known that we are doing excellent work here at USC, but it’s wonderful to have that confirmation from our peers.”

—James Gordon, associate dean and chair of Biokinesiology and Physical Therapy

The locations and times are listed, as well as the announced speakers. Plan ahead to make sure that the Keck School of Medicine does not participate in the main commencement ceremony at the University Park Campus.

Wednesday, May 13

Keck School of Medicine—M.S., Ph.D. & M.P.H.
4 p.m. at the Harry and Galasta Pappas Quad on the Health Sciences Campus. Paul Zachary Pappas, associate professor of biology, University of Minnesota Morris. Reception will follow.

Friday, May 15

Biokinesiology & Physical Therapy
11 a.m. at Bovard Auditorium at the University Park Campus. Veronica Jauriqui, a LAPD officer shot in the line of duty in 2006, will share her inspiring recovery story.

Dentistry
11 a.m. on the Intramural Field at the University Park Campus. Arthur A. Dugoni, Dean Emeri- tus of the Arthur A. Dugoni School of Dentistry, University of the Pacific.

Occlusional Science and Oc- cupational Therapy
10:30 a.m. on the lawn west of Lussey Library at University Park Campus. Shawn Plipps, distinguished professor and program director, the Occupational Therapy Association of Califor- nia. Reception will follow.

Physician Assistant Program
10:30 a.m. on the southwest lawn of the Hancock Building (AHF) at University Park Cam- pus. Robert Miller and Robert Sachs of the Keck School of Medicine will speak. Reception will follow at the same location.

School of Pharmacy
3 p.m. at the Harry and Galasta Pappas Quad on the Health Sci- ences Campus. Paul Gregerson, chief medical officer of the JWJH Institute. Reception to follow in the Upper Quad.

Sunday, May 17

Keck School of Medicine—M.D./Ph.D., M.D.
3 p.m. at the Shrine Auditorium. Peter J. Ratusnok, president for assessment programs of the National Board of Medical Examiners. Reception will follow at Founders Park at the University Park Campus.

HSC COMMENCEMENT EVENTS

The following lists the satellite commencement ceremonies for the Health Sciences Campus. The locations and times are listed, as well as the announced speakers. Plan ahead to make sure that the Keck School of Medicine does not participate in the main commencement ceremony at the University Park Campus.
Saturday, May 9
8:30 a.m. - 4 p.m. “Thyroid 2009,” Various speakers, Los Angeles Marriott Hotel, Downtown Los Angeles. Info: (323) 442-2555

Hospital operating rooms run on ‘penguin power’

By Sandra Levy

With nearly 20 stuffed penguins inhabiting the operating room reception area of USC University Hospital, it’s never long before visitors ask, “What’s that all about?”

For Kevin Wagner, nurse manager of the impatient operating rooms at USC University Hospital, the answer is that the birds represent some of the best qualities of operating room nurses and technicians—including an ability to thrive in a demanding environment as a result of cooperation and teamwork.

Last year, when trying to develop a program to motivate the staff and reward them for exceptional work, Wagner recalled watching the 2005 movie March of the Penguins. He was impressed by the penguins’ behavior and immediately drew a parallel to the behavior of his staff of 90 nurses and technicians.

“The penguins depend upon each other for survival and protect each other from cold and predators. They work as a team; alone they will never survive, but together they are strong,” Wagner said. “In the OR, staff members have a common goal and direction, but if someone gets off track, one of their colleagues will lead them back to the right track.”

“Throughout each month, OR staff members nominate their colleagues to be recognized as ‘Penguin of the Month.’” Wagner and other department leaders vote on who should be awarded recognition and that person’s name is announced during a staff meeting.

“The winning penguin receives penguin-inspired memorabilia and has his picture posted in the unit for that month. “I truly believe that this simple program has boosted morale in our unit,” Wagner said. “One of our staff told me that even though the program is really hokey, she loves it and she really wants to be a penguin!”

Penguin of the Month award winners are recognized at the March of the Penguins event. This year, the event will be held May 14.
